

# **Northstar Market Group - Store Operations and Closing Policy (partial extract, rev. 4, effective 2025-02-01)**

## **1. About this policy**

This policy applies to retail store operations at all Northstar Market locations.

This policy does not prescribe step-by-step procedures for individual roles; each department maintains its own procedures.

Store Operations owns this policy document and publishes each revision on the intranet.

Store Managers review proposed changes to this policy every quarter.

## **2. Store hours**

Stores open to customers at 7:00 AM and close to customers at 11:00 PM, seven days a week.

## **3. Opening the store**

The opening team arrives 30 minutes before the store opens to customers.

Two employees must be present when the alarm is disarmed.

The opening Team Lead counts the \$150 starting float in each register before the first register opens.

#### **4. Closing the front end**

Front-end cashiers stop accepting new transactions at 11:00 PM, when the store closes to customers.

Cashiers are expected to finish their closing duties and clock out by 11:30 PM.

If closing work continues more than 15 minutes past the scheduled clock-out time, the Team Lead records the reason in the shift log.

A cashier who is unsure how to complete a closing task asks the Team Lead on duty before continuing.

The Team Lead may change the order of closing tasks or defer non-urgent tasks to the opening team.

Employees are not required to remain after their scheduled shift to finish deferred tasks.

#### **5. General conduct**

Only cleaning products approved by Store Operations may be used on registers and food-contact surfaces.

Employees report unsafe conditions to the manager on duty immediately.

Customer receipts and cash must never be left unattended at a register.

Employees wear their name badge at all times while on the sales floor.
